

# Fagerhaug International School

## Academic Honesty Policy

Guidelines for members of the  
Primary- and Middle Years program

**Policy implementation:** August 2019

**To be reviewed:** August 2021

# Table of contents

1. Purpose for the policy
2. Approaches to learning and teaching academic honesty
3. Responsibilities relating to academic honesty
4. PYP Guidelines
5. MYP Guidelines
6. Glossary
7. Acknowledgements
8. Appendices

## Purpose for the policy

Fagerhaug International School strives to foster a culture of academic honesty. It is the aim of the school to nurture personal integrity and to promote an understanding of academic honesty as good practice in learning and assessment.

The IB talks about academic honesty as a set of rules and values that needs to be learned, making knowledge, understanding and thinking transparent. Students today are flooded with a variety of information from different sources, and they need guidance to know how to use the information with academic honesty. At Fagerhaug International School we want to teach our students how to respect intellectual property and authenticity. Students' action will be based on inquiry and reflection.

# Approaches to learning and teaching

The approaches to learning and teaching skills are essential in the understanding of academic honesty at Fagerhaug International School. In developing and enforcing the policy of Academic Honesty we encourage our students to be:

- Inquirers - who actively seek and acquire the skills necessary to conduct inquiry and research
- Knowledgeable - who explore concepts, ideas and issues through a range of sources
- Principled - who act with a strong sense of fairness and honesty taking responsibility for their own actions
- Open-minded - who appreciate their own cultures and personal histories while seeking and evaluating a range of points of view that may be different from their own
- Risk-takers - who are brave and articulate in defending their beliefs
- Communicators - who are clear in understanding and explaining which parts of their assignments are from other sources in a variety of modes of communication

In developing and enforcing this policy Approaches to Learning are directly linked. We encourage our students to develop the following:

- *Self-Management - adhere to codes of behavior and make informed choices*
- *Social - Responsibility, respecting others people's original ideas and work*
- *Communication - develop effective listening, speaking, reading and writing skills*
- *Thinking - acquire knowledge and apply it in the correct context*
- *Research - formulate questions, collect data and presenting research*

## Responsibilities relating to academic honesty

Student Responsibility	<ul style="list-style-type: none"><li>● Practice the attributes of the IB Learner Profile</li><li>● Read and understand the Academic Honesty Policy</li><li>● Be honest in presenting all school work</li><li>● Always cite when borrowing ideas or words from others</li><li>● Express ideas in your own words</li><li>● Support classmates without allowing copying</li><li>● Be able to express individual learning when working in groups</li></ul>
School Responsibility	<ul style="list-style-type: none"><li>● To structure the curriculum in a manner that allows students to develop the habits of academic honesty over time</li><li>● Ensure that students adhere to the basic principles of academic honesty (as appropriate for their grade level)</li><li>● Ensure that all members of the school community understand the value of academic honesty</li><li>● Ensure that incidents of academic dishonesty are dealt with in a manner appropriate to the assessment practices of the IB</li><li>● Promote a consistent approach to citation by the use of referencing tools (MLA/APA)</li></ul>
Teacher Responsibility	<ul style="list-style-type: none"><li>● Show academic honesty in their own work</li><li>● Support students in developing the skills and attitudes required for completing assignments in an academically honest manner</li><li>● Teach how to use referencing tools</li></ul>
Librarian's Responsibility	<ul style="list-style-type: none"><li>● Promote academic honesty within the school by organizing workshops</li></ul>

	<ul style="list-style-type: none"><li>● Act as a liaison for both teachers and students to provide ethical guidance regarding citations and common formats promoted by the school (MLA/APA)</li></ul>
Parent Responsibility	<ul style="list-style-type: none"><li>● Read and understand the Academic Honesty Policy</li><li>● Distinguish between reasonable support in your child's work and doing the work for them.</li><li>● Give feedback by asking questions, not giving answers to your kids.</li><li>● Be a positive role model and model practices</li></ul>

# Academic honesty in the Primary Years Program

- Taking credit for a certain task or work reflects that you are **knowledgeable**. People will know they can refer to you to find out more information about your topic.
- Using your own words when presenting your work.
- Sharing credit for a particular task reflects that you are **principled**. People will see you are an honest and respectful person.
- Giving credit for work that isn't yours reflects that you have **integrity**. You can distinguish the difference between what is fair and what is not, because you are an honorable person.
- Contributing equally while working in a group, then you are showing respect for others' opinions and this reflects your cooperation. People will agree that you are a **good listener** and can **work well with others**.
- Working individually when the task requires so, shows your independence and confidence. You know you can do the work and you will perform your best.
- Supporting/modelling your **thinking** in your own words
- Citing sources and creating a bibliography

## Academic honesty in the Middle Years Program

- The student is presenting his/her understanding of the inquiry supporting/modelling individual thinking
- Taking full credit for their own work and giving full credit to others who have helped or influenced, or for whose work that was incorporated, by citation or creating a list of work cited page.
- Collaborating with other students only as specified by the teachers. The student can demonstrate who took on which role based on process journals/notes, reflections or by writing or stating the name of the author in the text or presentation.
- Submitting assessments/ tasks on time, following an action plan.
- Following teachers' requirements for each assessment/task, using appropriate resources, referencing and tools
- Create references and citations, use footnotes/endnotes and construct a bibliography according to recognized conventions (MLA/APA)
- Academic honesty is being developed in reference to the ATL skills; research including both information and media literacy skills

# Key terms to understand Academic Honesty

**Academic misconduct:** The IB organization defines academic misconduct as behavior (whether deliberate or inadvertent) that results in, or may result in, the candidate or any other candidate gaining an unfair advantage in one or more components of assessment.

**Academic honesty:** Behaving and working honestly in researching and presenting schoolwork. This includes respecting the ownership of the ideas and material of other people, and behaving appropriately when taking tests.

**Collusion:** Copying someone else's work is collusion. Even if you have 'collaborated' with another student, the work you present must be your own.

**Duplication of work:** Duplication of work is defined as the presentation of the same work for different assessments

**Malpractice:** The IB Organization defines malpractice as behavior that results in, or may result in, the candidate or any other candidate gaining an unfair advantage in one or more assessment components.

**Misconduct:** Taking unauthorized material into an examination (whether the student uses it or not), behaviour that disrupts the examination or may distract other students and communicating with another student during the examination.

**Plagiarism:** The representation of another person's thoughts or work, as the student's own in order to gain an unfair advantage. This includes using another person's work without citation or sourcing.

## Procedures - reporting, recording and monitoring

<p><b>Academic Dishonesty at the Primary Level</b></p>	<p>In the PYP, academic dishonesty is treated as a learning opportunity. Instances of verbatim copying or lack of citation are considered first draft material, and students are taught the skills needed to rework the material in their own words and cite quotations. Self- evaluation and teacher explanations of rubrics provide methods for reflection on a student’s ability to do academically honest work, and goals will be set by the student or together with the teacher to improve skills and attitudes leading to academic honesty. Malpractice is considered generally to be the result of a lack of language and or research skills, and is addressed accordingly. In the event that a student with proficient language skills willfully and deliberately continues malpractice, a meeting may be called between the teacher, parents and the student, and ultimately between the principal and parents. Notes of continued malpractice may be recorded in the student’s file.</p>
<p><b>Academic dishonesty in MYP 7-8</b></p>	<p>In the lower years, students are still developing the approaches to learning skills required for approaching assignments with academic honesty. The teacher must first decide if evidence of malpractice is due to a lack of academic honesty skills or a deliberate act of academic dishonesty. In both cases, a record will be placed in the student’s file for tracking. With guidance, the student will be given the opportunity to rectify the situation. If the malpractice was a deliberate act of academic dishonesty the student will be given a formal warning and the opportunity to rectify the situation. The work will be awarded a lower level for the relevant assessment criterion if parts of the text is plagiarized. If the whole text is plagiarized the student will achieve the level 0 for the assessment criterion assessed. The issue will be referred to the MYP coordinator for further action and an academic honesty letter will be sent home to parents.</p>

<b>Academic dishonesty in MYP 9/10</b>	<p>If a student hands in work where plagiarism is apparent, due to a lack of referencing skills, the student will be given the opportunity to rectify the situation within a given period of time. The work will be awarded a lower level for the relevant assessment criterion. The assessment level awarded needs to be given according to how much of the text is copy and paste. If a student hands in work where malpractice in the form of deliberate plagiarism or collusion is evident, the task will receive a 0 in the relevant assessment criterion. In addition, the issue will be referred to the MYP coordinator and an academic honesty letter will be sent home to parents. In subsequent instances of academic dishonesty, the work is once again awarded a level 0 for the relevant assessment criterion. In addition, parents will be asked to attend a meeting with the subject teacher, MYP coordinator and relevant principal. The purpose of the meeting is to determine whether there was a clear attempt to deceive on the part of the student and possible consequences that could include suspension.</p>
